

Kymanox

Get projects **DONE**.

A Sampling
of Our Clients

Kymanox (ki'-mah-noks') is a diversified organization that helps its clients in the biotechnology, pharmaceutical, and medical device industries achieve their mission-critical objectives. Besides providing contract services, Kymanox also develops and maintains products for use in the same industries, as seen on KymaSTORE.com.

Equipment Validation (Including Automation)

Kymanox has provided equipment validation services for a multitude of systems in a wide range of industry areas.

- Viral Filtration Skids
 - Filtration processes consisted of the following steps: Storage Solution Removal, WFI Flush, SIP, Filter Leakage Test, Buffer Flush, Filtration, Filter WFI Flush, Filter Washing, CIP with cleaning solution, CIP with WFI, and Storage of System.
- Multiple Effect Still and Control System
 - System consisted of an evaporator, separator, condenser, and control system.
- High-Performance Liquid Chromatography Skids
- Oligonucleotide Synthesizers
- Inline Buffer Dilution Skids
- Automated Skid Manufacturing Systems
- Liquid Nitrogen Storage Tanks
- Compounding Tanks
 - Utilized to compound commercial batches of ophthalmic solution and transfer the bulk solution to the Blow/Fill/Seal (BFS) machine for filling.
 - Included Lee 300L compounding tanks with Lightnin mixer, Lee 500L kettle tank with Lightnin mixer, and side scraper.
 - Transfer lines between the two tanks include sterilizing filters; transfer lines between the tanks and the BFS machine included straining filters.
 - All process and utility valves, mixers, and monitoring devices used for processing and cleaning were automated.

- > The US division of a Japan-based global company that provides platform purification and processing solutions for the biotechnology industry.
- > A Contract Manufacturing Organization (CMO) specializing in aseptic liquid-filled products, in both single-use and bulk packages.
- > A cGMP facility focused on cellular and tissue based processing.
- > An American pharmaceutical company that has established and built strong products in neuroscience, cardiovascular, oncology, and medical devices.
