

FOR IMMEDIATE RELEASE

Kymanox Cooperative Student Wins Co-Op Student of the Year at Northwestern

Kymanox Project Specialist, Megan Dunham (CAPM Certified), has been selected as Northwestern University's Co-Op Student of the Year.

Gurnee, Illinois, USA | Wednesday, 09 November 2011 | Kymanox is pleased to announce that Megan Dunham has been selected as the 2011-12 Walter P. Murphy Cooperative Engineering Education Student of the Year winner. Dunham has been a Co-Op for Kymanox since March 2010 and has been a key member of the Kymanox team for the last year and a half. Throughout her time as a Project Specialist at Kymanox, Dunham has served in many roles. She acted as the primary on-site representative for Kymanox's second largest client in the Midwest region. She was a member of a four person team responsible for a re-validation program at an aseptic, liquid-fill facility. Dunham also led the Kymanox New Employee Task Force and maintained a Sales and Marketing role at the 2010 and 2011 national BIO conferences in Chicago and Washington, D.C.

As Northwestern University's winner, Dunham will now be nominated for Co-Op Student of the Year in national competitions sponsored by The Cooperative and Experiential Education Division (CEED) of the American Society of Engineering Education (ASEE) and The Cooperative Education and Internship Association, Inc. (CEIA). Dunham is scheduled to graduate in the Spring of 2012 with a Bachelor's of Science degree in Chemical Engineering.

Supervisor and Kymanox Technical Project Manager, Megan Gladfelter, says, "Megan has far exceeded our expectations for a Co-Op student with her exceptional quality of work, initiative to learn, and ability to adapt to challenging environments. She has reset the bar for future Kymanox Co-Ops and is well deserving of this award." President and CEO, Stephen M. Perry, states, "It is fitting to have Ms. Dunham be recognized for this award. We are proud that our six-year old program has evolved to the point where it can support and elevate talented individuals such as Ms. Dunham. Furthermore, we hope this recognition will help us to continue attracting top talent each year for the two openings in all of our regional offices."

About Kymanox:

Kymanox (ki'-mah-noks') means *Ideal Knowledge Transfer*™

Using our technical project management approach and partnership network, we assist organizations in achieving their mission-critical objectives. We serve the Biotechnology, Pharmaceutical, and Medical Device industries in the following areas: Process Operations, Engineering, Quality, Regulatory Compliance, Computer Systems, and Training.
