

Project Data Access Tool

Manage Your Next Project with KymaPRO™

KymaPRO™ from Kymanox is available for companies who desire efficient and effective project organization and data access, especially for projects that are multi-company and involve partners and contractors. **KymaPRO™**, which means “data access” in Greek, expands on Kymanox’s current expertise in integrating available information technology for managing large, technical projects. With this easy-to-use, web-based system, your project can achieve unparalleled benefits:

- Simple online collaboration between distant and/or local project team members
- 24-hour access to all project documentation
- Eliminate “email attachment chaos” by centralizing all project documents into one secure location
- Avoid the complexity, hazards, and confusion of using a shared drive
- Avoid additional work at project completion; all project information and documents are automatically archived and organized for future reference
- Encryption and audit trail
- Save time and money while reducing risks
