Downloads

Kymanox offers a variety of products available for download from our KymaSTORE™ website-**templates**, training packages, and procedures. Within each category is an assortment of downloads targeted towards the **biotechnology**, **pharmaceutical**, and **medical device** industries. New and revised products are added on a continuous basis based on client needs and feedback.

Templates

Kymanox templates are **instantly usable** upon download to provide a quick start for a range of project tasks. There is a wide selection of templates on KymaSTORE™ including but not limited to:

- Standard Operating Procedure
- Universal IQ/OQ Protocol Template
- Validation Master Plan and More!
- Project Management Templates

Training Packages

The available training packages are designed to provide both **turnkey** and **collaborative** solutions to your training needs. They may be **customized** upon purchase in order to best suit **your specifications**. The selection of training packages includes:

- Good Manufacturing Practices (GMPs)
- Good Documentation Practices (GDPs)
- Validation and More!

System and Operating Procedures

A variety of procedures related to **GMP manufacturing** and **quality documentation** is available for download. The assortment of procedures includes but is not limited to:

- Data Recording Standards
- Deviations/Investigations/CAPAs
- Peristaltic Pumps
- BioSafety Cabinets (BSCs)
- Environmental Chambers and More!

Products

KymaSTORE™ is distributor for GXP-type products; we are always looking to add products based on client and project needs.
