

Kymanox Automation and Software Services

GMP Automation

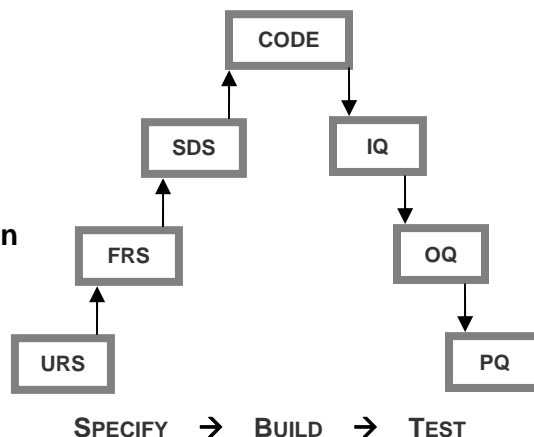

Kymanox has extensive experience with a variety of end-user applications, programming languages, and computing platforms. We can **design and implement** your next automated control system – **big or small**. Consistent with Kymanox’s *Ideal Knowledge Transfer™*, we ensure that you have the ability to manage your own system once our work is done. With our **technical project management expertise**, our projects remain within schedule, budget, and scope constraints. We offer and support the following:

- User, Functional and Detailed Design **Specifications**
- **Programming and Debugging**
- **PLC, HMI, and Network-Driven Systems**
- **SCADA, DCS, and Historian Programs**
- Rockwell Automation, ABB, DeltaV, Siemens, GE Fanuc, and More

GMP Software

From **development to startup**, Kymanox knows GMP automation and software. Troubleshooting and support is **available 24/7** to meet your production environment needs. We know how to add functionality to current systems while **maintaining a validated state**.

- Comprehensive **Computer Systems Validation**
- **Part 11 Compliance**
- ISPE **GAMP®-5** Documentation

Other Software

Kymanox does software and web development according to your specifications. We can build a new application from scratch or integrate new technologies with existing systems.

- **Software as a Service (SaaS)**
- **Databases (SQL, Oracle)**
- **Web (HTML, PHP, XML)**
- **ASP.NET and Microsoft.NET**
- **Apache**
- And more!
